

alpha300 access

The alpha300 access is a high-quality confocal micro-Raman system that provides an entry point to WITec's technology.

Key features and benefits

- Class-leading capability within challenging budget and procurement environments
- High-performance Raman mapping
- Exceptional spectral quality provided by the WITec UHTS Raman spectrometer series
- High-quality and ultra-precise optical components
- WITec Raman and imaging know-how
- The future of Raman spectroscopy through upgradeability

Raman lab arrangement
